

Acronis True Image 11 Home

The brand-new Acronis True Image 11 is the solution you've been waiting for. This cutting-edge backup software allows you to make a backup of your PC with the OS and apps. In case of a system crash you'll be able to restore it in minutes. Your docs, music, photos, Outlook e-mails – just all your data and configurations will be recovered. No reinstallations, only a few mouse clicks – and there you are up and running again! With ATI 11, data loss is no threat anymore! Perform backup in the background, without interrupting other operations! Reduce downtime, getting back to work while restoration is in progress! Make scheduled backups and save them in Acronis Secure Zone, which is a protected partition accessed with Acronis utilities only. The XP-like interface of Acronis True Image makes it even easier to implement backup and restore operations.

(8.86mb) (\$49.99)

See the list of new ATI features to make sure that this software does meet your backup needs:

Try&Decide – explore the web, download new programs and open e-mail attachments without putting your machine at risk

Archive Encryption – an extra level of protection for your backup archives

Privacy Protection – be able to erase data so that it won't be recovered by anyone else

System State Backup – backup your system as it is at a given moment

Exclude files and folders from backup – optimize backup and storage

Automatically maintained catalog of backup locations – makes it simpler to manage your backup archives

Search for file in all archives – easily find and extract any file from your backup archive set

Message-level Outlook data restore – restore your Outlook e-mails
